Math 432 Implementation Homework 3

Due date: 19 April Sunday

You can get help from AI but write down your own code

1. (20 points) Implement DES encryption and decryption. Your code takes plaintext and key for encryption, and ciphertext and key for decryption.
2. (20 points) Implement AES encryption and decryption for 192-bit key. Your code takes plaintext and key for encryption, and ciphertext and key for decryption.
