Math 432 Implementation Homework 1

Due date: 29 March Sunday

You can get help from AI but write down your own code

1. (10 points) Write down a code doing frequency analysis. Its input is a text file and its output is the frequency of each letter in the text. Then, it can decrypt a given monoalphabetic cipher.
2. (10 points) Write down a code computing the number of all the polynomials of degree 5 over $\mathbb{Z}_{26}$ which are permutations.
